PROFESSIONAL SUMMARY

Computer Science student with hands-on experience in production environments at Sanmina, developing Python automation scripts and working with industrial MES systems. Built full-stack applications using React, Node.js, and MongoDB with AI integration. Seeking Junior Software Engineer roles in backend and full-stack development.

EDUCATION

B.Sc. in Computer Science Engineering – University of Guadalajara | *Expected June 2026*

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL

Frameworks & Libraries: React, Node.js, Express, MongoDB, Tailwind CSS

Tools & Platforms: Git, Docker, Linux, AWS S3, MES Systems, AOI/AXI

PROJECTS

LearnJN – AI Educational Web Platform
Full-stack web application enabling students to practice Python with AI-generated coding exercises. Integrated Jupyter Notebooks with OpenAI API for intelligent content generation. Built with React, TypeScript, Node.js, and MongoDB.

Pediatric Clinic System – Medical Management with ML
Multi-role React application for medical staff and patient management. Implemented AI-powered illness prediction from symptoms using Python and SQL backend.

Sportify – Sports Analytics Platform
React-based mobile web app with REST API integration for real-time sports data. Features user authentication and ML predictions for match outcomes.

PROFESSIONAL EXPERIENCE

Sanmina SCI – Test Technician | February 2025 – Present

- Develop Python automation scripts to streamline testing workflows in production environment
- Perform functional and electrical testing on electronic boards, documenting results and failure reports
- Operate MES systems and program AOI/AXI inspection equipment for quality control

Additional Experience
IT Technician, Litoprint (2024–2025): Maintained PHP/Laravel system for 25+ employees, SQL database support

Network & CCTV Technician, Millenium Digital (2022–2024): Network installation and technical support

LANGUAGES

Spanish (Native) | English (Intermediate)
